

Factory expansion increase production capabilities & IOT product line

Since 90's that HI SHARP established our R&D center and we has achieved OEM/ODM service globally , specially in USA, Germany,UK, Italy, and Japan top tier well known brands are our partners. We have provided customized service to match their requirements with higher standards and sustain the partnerships over decades due to our R&D and flexible Production capabilities.

HI SHARP will have a big step in the next two years as we're going to extend twice big territory in Taoyuan by 2023. We will start construction of our second factory near HQ next year to expand our production lines with triple production capacity. Rising concern of China and US trade war leads HI SHARP have order transfer effect since 2019 for those concern the manufacturing origin.
